

Hi Donna,

I wanted to take a moment to talk to you about the email I received today from you. But before I can, I think it is important to recap a few things.

First off, I will say again that you are a first class maker of orgonite. I enjoyed meeting you at the Expo and the products you showed on that day were amazing. I have to be honest and say that I did not know all of the different products that you produced. Now I know you seem to have some that are free and clear to whoever buys them, while there are others that are sold with certain stipulations. Some of these stipulations come in the form of sacred contractual affirmations and requirements on how these items are to be placed.

In regards to the rods that Chris and I learned about when you were a guest on our show, we wanted to have some to see the energy effects for ourselves and consulted with our guides on the multi-purposes of such a rod.....rather than the single use the ODB's dictated.

In all honesty, I was concerned about some of the language from the ODB's that you shared with me....specifically what is highlighted below. It contradicts our understanding. But we were instructed to still work with you all. So I just thought we would easily agree and was happy to continue.

Here is some additional info the ODB's shared about the Rods:

Dear Family,

Many Blessings!

Some of us believe we are here on Earth to be a "Point of Light" for clearing and healing.

Atonement is the act of Reconciliation with God by way of "Sacrifice and Resurrection" for the Sins/Dense Energies/Debris of Humanity.

We understand there are thousands of years of dense energies created by Humanity that is resting in the third and fourth dimensions.

This dense energy or debris as we call it, is weighing down the Earth's Ascension with the rest of the Universe.

Off Planetary Beings have assisted Earth in clearing this debris over time. In the 21st Century however, these Beings are seeking Cooperation with "Points of Light" to clear this debris.

This clearing is a "Course Correction" for the Earth's Ascension.

As Sovereign Beings on a Free Will Earth, we can direct our Divine and Powerful Will any way we choose. In order to assist in the "Course Correction," We Are "Surrendering" Our Will as the "Sacrifice and Resurrection" of Christ Consciousness in order to Serve/Reconcile with God/Creator.

The Rods of Atonement and the Affirmation of Atonement have been Co-Created to Assist those Called to Participate and Bury the Rod of Atonement as a Symbol of our calling as a "Point of Light."

Intention of the Application of Rods of Atonement:

Offering Atonement to the Earth is for the Earth; it is in no way Intended to Benefit or Protect Humanity. The Rod is only Activated when it is Offered in This Way...otherwise it is merely an artifact.

We Speak Aloud the Affirmation of Atonement When Burying the Rod of Atonement in an Area we

are Sovereign Over. Offering Atonement with the Rods in an area we are not Sovereign over is a Violation of Free Will and the Energy Created from that Violation will bounce back when Clearing is Intended.

We Invite the Burying of as many Rods of Atonement as You are Called; as long as They Are Buried with Sovereignty.

The Rods of Atonement are a Beacon/Point of Light...the more Points of Light...the more Clearing.
.....

I never took a moment to explain my understanding and why I had a conflict with some of the language from what you sent above, but feel I need to clearly state my understandings.

So, for the first statement:

Atonement is the act of Reconciliation with God by way of "Sacrifice and Resurrection" for the Sins/Dense Energies/Debris of Humanity.

Yes, this is what Atonement means. It does not matter whether it is written this way or in a clever way that negative entities would use as consent..... such as **At-One-Ment that are in your affirmations.**

Since it is our understanding that the one benevolent source is within all of us and that religious dogma was created to have energy freely given to negative entities who are not the benevolent creator or source.....well, there is nothing to atone for. It is just an energy trap....giving the energy to them instead....which they need your free will to do.....so you must say it is okay.....i.e., agree to atonement. We advise against this.

As for the second statement:

Offering Atonement to the Earth is for the Earth; it is in no way Intended to Benefit or Protect Humanity. The Rod is only Activated when it is Offered in This Way...otherwise it is merely an artifact.

Well, you would think that since we would never say they attached affirmation and did not bury them, then above statement would apply....correct?

But what actually occurred is that we blessed them in our own way for the highest good and put them in a structure to see their affects. To our amazement it created a bubble and worked amazingly well. This bubble did keep out entities and signals....so why could it not be for humanity? This is another red flag. It is our understanding that mother earth does not need our help....she is way ahead of all of us on the learning stage. Nature can be sometimes harmed by negative energies, but this is easily rectified by declaring neutrality to an area and asking benevolent beings to help assist with correcting of the energy. At least, that is our understanding. So again, why not help humanity??

So we were excited to talk to you to share our unbiased experience and felt we could work with you both on possibly refining the language. And of course, our guides encouraged us to do so. So I was happy to send you that email on my excitement to share with all. I guess I was naïve.

.....

As you recall, on September 12th there was a pretty uncomfortable discussion between the 4 of us. During that discussion, Chris tried to inform Sienna that he felt very strongly that the beings that were coming through (The ODB's) were not for the highest good. And that feeling became stronger once Sienna stated that she made a contract with those beings and that she put a piece of herself in every rod.

This greatly saddened me because it is our understanding that benevolent beings do not "make contracts" and we have always stated that you do not give pieces of yourself away. We shared with you our findings thinking that maybe you did not know....however, Sienna (or the ODB's...or both) was furious that we discovered this. And even demanded the rods back if they were not utilized exactly as instructed. All our attempts to say they were many red flags being stated went unheard.

So when the phone call ended, I personally was quite distressed because of my personal concern for you both. I was also concerned about how people would be "cherry-picked" to have any rods because you only wanted those who would do exactly the ODB's bidding. That was another huge red flag.

We had a visit from those claiming to be the ODB's after the phone call. We have also had several visits since and they were not pleasant. So, again, we are greatly concerned. I must be true to what I teach, so discernment is the key. I wish I could agree with their benevolence, but I do not.

So although your ODB's were quick to "bless Chris out" and then appeal to my ego saying that I was the actual creator of these new rods....and you still wanted to work with me to bring them to the masses.....I again was greatly concerned.

When you sent the new affirmation, I again saw the language of giving over ones free will and energy.....as I stated in my response.

Rod of Clearing and Healing Affirmation
(Which will be inside the Rod of Clearing and Healing)

I Am my I Am Presence.

I Am a Sovereign Being.

***I Surrender my Will and my Life
to the Care and Service of Creator.***

*I Center within and Know
the Core of my Being is my Anchor.*

***I Am At-One-Ment
with All there was, is, and will ever be.***

The Eternal Flame Fuels

Love for Myself, for Humanity, and for All Living Beings.

*I Am Guided to Express Who I Am
by the Wisdom of my Heart.*

*I Am with Love, Compassion and Forgiveness
Clearing and Transmuting All Energies blocking the Highest and Best of Myself, my
Environment,
and this Dimension.*

*I Am Clear, Whole, Safe and Surrounded
by the Love and Light of Creator.*

***We Are One Heart, One Mind, One Body, One Spirit ~
And So It Is!***

The Lifting <thelifting2017@gmail.com>

Hi,

I hope you can feel how honored I feel that you would go and do right away. It shows your level of commitment and shows every ounce of who you are. No matter how our paths cross I will always want you to know that.

I plan to discuss these rods and will ask people to honor the intended premise and the affirmation. I will never not honor this.

In regard to the Rod of Clearing and healing Affirmation and the Rod itself.

What I know is so valuable is the state of mind of the people that receive these and the intent they give while reading the affirmation. Although your intent is one thing, their co-creative process allows for their intent to drive their source given right to determine their own path.

Part of our mission is to try and educate on the fact that there is indeed benevolence as well as a malevolence, and that those malevolence forces have tricked people into giving their free will away. Some people have called such groups involved the cabal, etc. We have tried to stay away from controversy regarding this, but know that people give such symbols as the Eye of RA the darkness connotation while others give it a good connotation.

We also feel strongly that our message is about building from within the self and bringing that source given co-creative powers outwards, but do not allow your energy to be harvested by malevolence.

So in regards to what you have provided, I am asking if the ODB's will recognize our mission and path and consider 2 changes.

could these rods not have the eye of RA on it..... just have the winged heart.

Could the statement:

*I Surrender my Will and my Life
to the Care and Service of Creator.*

be either taken out or modified to state

I add to these rods my intent that they should be used for the upliftment of humanity in service to the benevolent Creator of all.

Doing these things will allow for our teachings to match.

Is this possible at all?

Thank You again for all you are doing. With the most loving regards,

Joanna

Although I did not mention all of the highlighted language that bothered me..... It is our understanding that one does not need to give their own energies to clear and transmute.

I was hopeful that we could still work together. But your response said otherwise. At that time the ODB's said no to changes and said we would part ways.....remember?

So I have to say that it was a surprise to receive this email today.

Hello Joanna,

The ODB's asked us to send you the affirmation that is embedded into the Rods and Pendants of Clearing and Healing. We will be making the first batch of these over the next week. Hope all is well over there!

*Many Blessings,
Donna*

Affirmation of Clearing and Healing

I Am The I Am Sovereign Soul Being Free Will Human that came forth to this Dimension for this Time.

*I Am at One with Supreme Creator ~ The Great I AM ~ **and Pray for Assistance to Align my Free Will with the Will of Creator,** and to direct my Creative Life Force Energies for the Highest And Best of All There Is.*

I Center and Ground my Whole Self with Creator's Light Energy from the Core of the Earth to the Center of The Sun and it Surrounds and Anchors Me in Love. Creator's Love fuels the Love for Myself, and My Love for All There Is.

I Trust the Wisdom of My Heart that Guides Me on This Journey, and to Express the Divine Being that I Am.

I Am At-One-Ment with All there Is and extend Love, Compassion and Forgiveness while I beseech Love, Compassion, and Forgiveness for Myself.

I Am with All That I Am Clearing All Energies blocking the Highest and Best of Myself, my Environment, and this Dimension, and Transmuting these Energies to the Highest and Best of All There Is.

I Am Clear of All Negative Energies, Whole in Spirit and Oneness, and at Peace with Myself and All There Is.

We Are One Heart, One Mind, One Body, One Spirit ~ And So It Is!

I find the timing of this email is interesting. It comes upon the heels of us destroying one rod and clearing the crystals in the others and turning them over to Epsilon (head of the nature code) who then instructed us on where to put them for the highest good....Which was not sovereign property of ours....unless you call the world our property. However, Epsilon has them now. I must say that it is funny that the beings claiming to be the ODB's did not want to interact with Epsilon, The Council of One, or pretty much any other benevolent entity or race that we knew. So, I guess it is up to each individual to discern if we were talking with your ODB's or not.

It is hard to be authentic Donna, as well as discern, but I am trying to do both now. You may not have seen all of our shows, so I need to let you know my core, un-negotiable beliefs:

1. We come from a benevolent source who has given us free will
2. We are energetic beings and some beings use this energy as a food source
3. Negative entities, existing around us, do trick people with flowery language, in dreams, and the subconscious to agree to give up their personal energy to feed themselves or those they work for.
4. The secrecy, contractual request, order of affirmation and language used above in your affirmations suggests that 3. (above) is occurring with some of your products.

Please do not associate me or The Lifting as any sort of endorsement to this. We do not believe these are for the highest good.

On a personal note, I am a bit ashamed that I did not fully understand everything before I asked you to be on our show. But I am torn. I believe in orgone and what it can do.....and you helped to introduce that understanding....so I am eternally grateful. Chris and I are perusing this still and are working with others in this area. The guides assure me that this entire experience needed to occur and is for the highest good. But I must admit it is hard.

And it saddens me to say that I feel greatly responsibly to those who listen and support us ...so I must be genuine and authentic to them as well. I will be sharing this experience and everyone will have to discern for themselves. I do not wish to create any for or against....because I believe in Orgone energy just like you. But I cannot in good conscious let people think that I support all of the products you offer. It is a buyer beware moment.

I will always wish you well Donna.

To the ODB's:

It has been the practice of the ages for negativity to give good info and one discerns it is good, then to add negative in hopes that one will not see the difference...That is why we preach discern the message and not the messenger.....to know the difference and pick the kernels of truth and leave the rest. Humanity is becoming wiser all the time. Please take any disagreement you have with this to Epsilon and the one benevolent source.

Joanna
